drops of freezone upon a tender corn or painful callus and instantly the soreness disappears, then shortly you will find the corn or callus so loose that you can lift it off with fingers. No pain, not a bit of soreness, either when ap-

plying freezone or afterwards, and it doesn't even irritate the skin. Hard corns, soft corns or corns between the toes, also toughened calluses, just shrivel up and lift off so easy. It is wonderful! It
